

Critical Decision Support Simplified

In today's complex business environment, analysts often find themselves bogged down by the manual, time-consuming process of crafting reports and dashboards. This can take days or weeks, involving a painstaking compilation of data, analysis, and presentation creation. Such delays can hinder making decisions, posing a significant challenge for many organizations.

At Energy Exemplar, we understand and recognize the critical need for making decisions that are well-informed and strategically timed. Our Executive View is a dashboard and analysis summary tool that provides key insights and metrics for executives and decisionmakers. It features intuitive boardroom-ready visualizations and reports that enable quick understanding and straightforward review of complex market dynamics, nuanced trends, and alternate scenarios.

PLEXOS Cloud Executive View streamlines the decision-making process by automating the workflow from dataset to insights. With PLEXOS Simulation Ready Datasets, users can create custom scenarios and auto-run simulations via the Command Line Interface (CLI). Results are refined through an intuitive dashboard into a Power BI-based executive view, summarizing key metrics and trends for comprehensive market insights.

This solution grants decision-makers access to an easy-to-navigate interface for immediate insights into data and analysis. Analysts can guide executives with tailored recommendations, selecting from preconfigured options or customizing support through advanced tools.

By simplifying and automating data analysis, PLEXOS Cloud Executive View ensures that strategic decisions are informed, timely, and driven by the latest, analyst-curated information.

End-to-End Reporting

Built to meet the needs of analysts who prepare data, models, visualizations and reports, and decision-makers who consume analyst output to make strategic decisions affecting enterprise performance.

PLEXOS Cloud Native

Developed and delivered entirely on the secure, reliable, trusted PLEXOS Cloud platform.

Efficient and Effective

Designed to optimize business process efficiency and enable practical, synchronous or asynchronous collaboration between decision makers and analysts on a unified platform.

PLEXOS Cloud Executive View

Effective decision-making is pivotal in business, often determining between profitability and loss, or smooth operation and a turbulent times. This process requires comprehensive data, advanced analysis, rigorous evaluation of alternatives, and confident decision-making to ensure favorable outcomes.

PLEXOS Cloud Executive View doesn't make decisions for you; it enables you to make the right decisions with at-the-ready trusted, analystcurated information and insight. With features like automated data updates, customizable dashboards, and interactive visualizations, you have everything you need to make informed, timely decisions that drive your business forward.

With PLEXOS Cloud Executive View, carry confidence with you from your desk to the boardroom, knowing that your decisions are backed by the latest, automatically updated evidence, and maintains integrity from data to model to study to decision.

Key Features

Dashboard: A customizable dashboard that automatically updates to provide a high-level summary of key metrics and trends.

Visualizations: Interactive charts, graphs, and maps that help users visualize complex market data, such as demand forecasts and price trends.

Reporting: Access pre-built and customizable reports on Marketplace that not only enable detailed analyses and summaries of market data but also incorporate insights from custom scenarios created by users.

Integration: Seamless integration with other data sources and systems, enabling easy access and analysis of additional market data and insights through automated processes.

Collaboration: Features that facilitate effortless collaboration among team members, including sharing of dashboards, reports, and analysis results supported by an intuitive user interface.

Dual Flows: Features two distinct intuitive workflows—Publish and View (Review)—designed to efficiently streamline the sharing and reviewing of analytical work, enhancing strategic decision-making.
